## CURRENT COMMENT.

DAILY COIN, the Chicago silver organ, has suspended publication.

A SUTTER county, Cal., man has a cat ranch, upon which he annually raises thousands of Maltese pussies for the fur market.

The Chicago Record calls the bargain for the return of Taylor, the defaulting ex-treasurer of South Dakota, a disgraceful dicker.

SAN FRANCISCO has decided that no flag except that of the United States may be carried in the public procession on the Fourth of July.

MASSACHUSETTS carried a fire insurance in 1894 of \$985,000,000, or about five times that of other states with about the same population.

JOE PATCHEN paced a mile in 2:08 over the kite track at Des Moines, Ia., making the fastest time of this or any other year to date for a stallion, and the track was not just in first-class condition.

J. S. PRINCE, a bicyclist, won a 10-mile horse-bicycle race on the 1/2-mile track at El Paso, Tex., recently in 32 minutes 17 seconds. Three horses were used in relays. The last horse was beaten 30 seconds. Prince fell twice, losing 1/4 mile one fall.

The latest sensation in the feminine circles of a Georgia town is the formation of a Trilby club. The one qualification for membership is perfection of feet. The club meetings are given up to the reading of papers on the care of feet, with the idea of diffusing a wider knowledge of the anatomy of the foot.

DAVID CHURCH, of Ridgewood, Ia., claims to have invented an electric camera which can be attached to the telephone or any other electric instrument or circuit, and which will reproduce a photograph of the persons speaking to one another. All actions and even changes in facial expressions are said to be faithfully shown.

The agricultural experiment station at Morgantown, W. Va., announced that it had made a study of cut worms under glass cases, and found that they turned into grasshoppers. The cut worms were very numerous on account of the scarcity for two years of quails and turkeys, and the station warned the farmers of that region that they would have to contend with a grasshopper pest this season.

The extraordinary extension of electric railway work during the last six months is to be followed by a further most important development—the use of electricity for freight cars. A scheme is now on foot to extend the electric lines to the great grain belt of the northwest, of which Minneapolis is the center, and to establish a regular service of electric cars built especially for the transportation of grain.

JUDGE NORTON, of Alexandria, Va., has granted a charter to a stock company, to be called the "Supreme Temple of the Silver Knights of America." The general objects are stated to be to establish a secret society for the purpose of seeking to secure in a legal way the free coinage of silver in the United States, and to make silver a legal tender for all debts, and to collect and expend money for that purpose.

A CAREFUL canvass of the members of the next house, so far as their position has been disclosed by their votes in previous congresses or by their public declarations, show about 24 republicans for and 220 opposed to free coinage. The Round Robin Suicide club, of New York, has since March 12 established a record of seven deaths. But it departed from its first purpose by recognizing the suicides of two women who died rather than survive the clubmen they loved. These women members were not compelled to spin the tee-to-tum, the stoppage of which obligated one of the Robins to take his own life. A member whose lot is to kill him or herself may use any means he or she may choose. The existence of this club was revealed in Bellvue hospital by a member who was brought to that place in a dying state.

AMONG the laws passed by the last general assembly of New York and signed by Gov. Morton was an act entitled "An act to protect all citizens in their civil and legal rights," which prescribes a heavy penalty for discriminating against any person of no matter what race, creed or sex, in the service provided by a hotel, restaurant, theater, barber shop or other public resort. It has been the custom in the past for most of the hotels either to refuse point blank to serve colored men or to make the service so bad as to be unbearable. But this latter will not do under the new law.

"MODERN invention," says the Chicago Times-Herald, "is bound to get rid of the horse, and the services of that noble animal are being dispensed with in numberless ways. Steam and electricity have ruthlessly shouldered him aside, and the bicycle threatens him in one of his most delightful uses. As a culmination to these comes the 'horseless carriage,' which has just shown itself to be a most pronounced success in France. Vehicles of that kind made a competing race between Bordeaux and Paris the other day, a distance of 736 miles, and the time was an average of 15 miles an hour."

"What new substance, my dear?"  
"The element in the air that has just been detected."  
"Oh, that, my dear," he answered, "beaming over his spectacles with the good nature of superior wisdom, 'is known as argon.'"  
"Oh."
